In 1998 ECLER presented its first multichannel amplifier, the MPA280. Today ECLER offers the most comprehensive and versatile multichannel amplification line. MPA-R are the best choice for the pro audio installer seeking trouble-free and reliable multi channel amplifier solutions.

MPA-R line comprises five 4 and 6 channel models with power ranges of between 80W RMS/4ohms and 410W RMS/4ohms with tried-and-tested reliability and extreme flexibility as provided by the possibility of linking input channels and bridge-grouping channels.

Key features

- 2 RU high, 19" installation multichannel amplifier series
- Oversized linear power supply
- ECLER SPM patent pending technology (MPA4-150R, MPA6-150R, MPA4-400R)
- Individual input sensibility controls with sealing possibility to avoid unwanted manipulation
- Signal presence (SP) and CLIP indicators for each channel
- Balanced inputs via XLR connectors
- Independent VCA remote control for each input channel on all models via 0-10 V signal, or remote wall volume control.
- EUROBLOCK load and VCA remote control connectors
- Noiseless convection cooling (MPA4-80R and MPA6-80R)
