

2VSP

audio sound sources

Double sound source including one FM radio tuner and one multi-format audio player: CD-drive, USB slot and SD card slot readers. The 2VSP includes 3 audio outputs: tuner output, multi-format player output and a third one called PRIORITY, which delivers the same audio as the CD / USB / SD player as long as it is playing, switching to the FM tuner audio when the CD / USB / SD player stops. This way your installation can be always fed with audio contents. Additionally, the Vari-Speed control lets the user change the audio track's tempo, a function especially interesting in fitness applications.
