

## Abis Tonearms

| Description                                       | SA-1                                       |
|---------------------------------------------------|--------------------------------------------|
| Color                                             | Chromate(Sprinkled silver colored plating) |
| Effective Length (Tonearm pivot - stylus)         | 228mm                                      |
| Practical Length (Tonearm pivot - Spindle)        | 212mm                                      |
| Overhang                                          | 12mm                                       |
| Offset angle                                      | 22°                                        |
| Tracking Error angle                              | ( )                                        |
| Horizontal moving sensitivity                     | 30mg                                       |
| Vertical moving sensitivity                       | 20mg                                       |
| Vertical Tracking Force (VTF) range               | 0 - 3 g ( 6g* Option)                      |
| Cartridge + Headshell weight range                | 12.5 - 38.5 g                              |
| Height Adjustment (Plinth to arm wand centerline) | 41 - 80mm                                  |
| Horizontal bearing                                | Radial bearing                             |
| Vertical Bearing                                  | Radial bearing                             |
| Output plug                                       | RCA (XLR : Option)                         |
| Output Cable                                      | Single core shield copper                  |
| Tonearm Audio Lead wire                           | OFC 4N Copper Separate wiring in armwand)  |
| Headshell lead wire                               | Copper with gold plated terminal           |
| Headshell                                         | Machine tooled Aluminum                    |
| Tonearm Net Weight                                | (750g)                                     |
| Attached standard Headshell Net Weight            | (17g)                                      |
| (*) : With additional subweight                   |                                            |
