Lifeview FlyDVB Trio CardBus

The world's first triple reception TV card for your laptop is actually four products in one! FlyDVB Trio CardBus brings you DVB-T, DVB-S and analog TV reception as well as analog video capture in one incredible product! Experience the incredible resolution and clarity of digital television - watch your favorite sports event with DVB-T reception, or watch TV from around the world with DVB-S satellite TV reception! You can still watch all your favorite channels on analog TV, thanks to the globally compatible silicon TV tuner! A full set of onboard inputs makes it easy to connect your VCR or camcorder to save your home movies to digital format!
